

## Copyright

The material published in this e-zine is copyright in the author of that material. The text may, unless otherwise indicated, be copied in whole or in part for non-commercial use on the understanding the the author and the publication are duly acknowledged. Permission for the use of any photographs should be sought, on each occasion, from the editor of *The Pewterer*.

## Our approach to linking

How links are chosen for The Pewterer

You will find in this e-zine links to a number of websites. We select links that we believe are relevant to the subject of pewter or to the articles that we are publishing, whether for further relevant, or practical, information or other key source material or for background information or otherwise.

We usually seek permission for each link. While links are selected and reviewed when the page is published, we are not responsible for the content of the websites, which may change and which are, in any event, beyond our control. Some of our links may be to websites which also offer commercial services, such as online purchases. The inclusion of a link to a website should not be understood to be an endorsement of that website or the site's owners (or their products/ services).

## Opinions

Opinions expressed in this e-zine are those of the several authors and not necessarily those of the editor or publisher.

## Advertising

Advertisements are accepted by this e-zine in good faith. We cannot be responsible for any statements or representations made in any advertisement.

## Legal Deposit for websites and electronic publications

From 6 April 2013, legal deposit covers e-books, e-journals and other types of electronic publication, plus other material that is made available to the public in the UK on handheld media such as CD-ROMs and microfilm, on the web (including websites) and by download from a website. Where electronic content is freely accessible on the web (as is the case with *The Pewterer*), without any requirement for users to log in or pay, the British Library will attempt to archive it directly through a crawling process.
